## Public status notice

This document distinguishes live assets, verified development milestones, active development, partial verification, and planned capabilities. It does not promise profit, guaranteed product releases, or universal availability.

## Official Token Identity

|                      |                                              |
|----------------------|----------------------------------------------|
| <b>Name</b>          | Good Girl Coin                               |
| <b>Symbol</b>        | \$GGIRL                                      |
| <b>Network</b>       | Solana                                       |
| <b>Official mint</b> | 374oftw5HUr2s8GMRr3ELq2aS77uRFcW7u3Br1iDmoon |

Good Girl Coin is one token with one official mint. HIM, HER, UNITED, and all approved visual facets refer to the same \$GGIRL asset. They are not separate tokens.

## One Coin. Two Sides. Him. Her. \$GGIRL.

The HIM side represents the many facets of manhood. The HER side represents the many facets of womanhood. Neither side is limited to one stereotype, one outfit, one mood, or one visual identity.

The original woman-in-lingerie artwork remains part of the project's history as one valid HER origin facet. It is not the definition of HER, womanhood, or the entire token.

## Official Facet System

|               |                                                                                                                                                                                      |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>HER</b>    | May express confidence, intelligence, leadership, creativity, softness, resilience, elegance, sensuality, motherhood, ambition, community, and other respectful facets of womanhood. |
| <b>HIM</b>    | May express leadership, discipline, creativity, fatherhood, strength, loyalty, wisdom, style, protection, ambition, brotherhood, and other respectful facets of manhood.             |
| <b>UNITED</b> | A combined visual expression of HIM and HER. UNITED is not a third side and is not a separate token.                                                                                 |

Official coin-face construction uses HIM, HER, or UNITED at the top; GGIRL or \$GGIRL in the center; and GOOD GIRL COIN on the bottom rim.

## Representation Standards

Advertising should be tasteful, respectful, privacy-conscious, and appropriate to the company or product being promoted. No hypersexual styling, objectifying poses, unnecessary body emphasis, or generic substitute coin imagery should be used.

Coco Dior Monroe and Dey Dey Ramos may appear separately, together, or not at all depending on the campaign. Their likenesses should support the message rather than overpower it.

# Current and Intended Ecosystem Role

\$GGIRL is a live Solana digital asset. It is intended to support cultural participation, gifting, creator commerce, rewards, and approved settlement functions across the evolving Velvet ecosystem.

Those broader functions are not all available today. Each use must be described according to the relevant product's real development stage.

# Verification and Public Consistency

External platforms may display older token artwork or metadata. The official website explains how the visual identity evolved while the token and mint remained the same.

Verification on one DEX, wallet, explorer, or market-data platform does not automatically verify \$GGIRL everywhere. Each platform maintains its own review, indexing, metadata, or reputation process.

# Risk Statement

\$GGIRL must not be promoted as an investment. GGIRL Technologies makes no promise of profit, appreciation, income, rewards, or guaranteed financial return. Digital assets are volatile and may lose value. Planned capabilities may change or may not launch.

# Official Verification Details
